

## **Jose Kleiner**

---

### **Career Summary**

Working as a java backend developer for five years. Developed multiple microservices of type Rest and SOAP, as well as specific implementations using frameworks such as Spring, Spring boot, JAXB2, JPA, Hibernate and others related to communication between services, security and payments. Also achieved both backend and frontend implementations in legacy software from the education industry, working on highly complex code bases, resolving bugs and implementing new features such as file systems and integrations with other institutions and providers. Results-oriented person, always willing to provide the best quality and performance in his developments.
